

**REMARKS**

The application comprises claims 1-38, 40-44, 46-47, 57-62 and 66-87, of which claims 86-87 are new. Claims 1-38, 40-44, 46-47 and 57-62 were already allowed by the Examiner.

It is noted for the Examiner that claims 66-80 and 84-87 are dependent on claims which have already been allowed. Therefore these dependent claims should be allowable by virtue of their dependence on previously allowed claims.

As indicated before, claims 59-60 have been substantially copied from US patent 6,725,259, with the intent of preserving the right to provoke an interference under 35 U.S.C. 135(b) at a later date.

Claims 86-87 are new claims which find support in the specification and claims as filed.

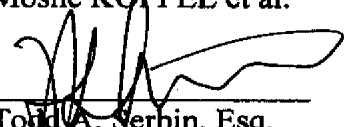

Claim 66 has been amended to: 1) depend on allowed claim 59; 2) to delete limitations which would be duplicative in view of the dependency; and 3) to add the limitation that references are "from the at least one hub to targets".

Claim 68 has been amended to clarify that it is the targets which are further comprised by sites that are linked to by a minimum number of said hubs.

Claim 81 has been amended to remove the limitation that references are "between the documents" and to add the limitation that references are "from the at least one hub to targets".

If the Examiner is unable to agree that the claims are all patentable, he is respectfully requested to contact Maier Fenster at toll free 1 (877) 428-5468. This number connects directly to our office in Israel. Please note that Israel is 7 hours ahead of Washington and that our work week is Sunday-Thursday.

Respectfully submitted,  
Moshe KOPPEL et al.
